

SWIRED

Plant Breeders Right

Breeder : C. DE REGIBUS

Editor : STAR FRUITS & COT INTERNATIONAL

A reference in it's maturity period.

MATURITY PERIOD : BERGERON + 7 days

AGRONOMY

Habit : Upright
Vigor : Medium to high
Fruit set : Medium to fast
Productivity : High

FLOWERING

Flowering period : Early
Floribondity : High
Alleles : S2 Sc
Pollinators : Self-fertile
Thinning level : High

FRUIT

Caliber : 3A/2A
Shape : Oblong
Optimum picking colour : 7-8
Firmness : 70-75
Eating qualities : Very sweet and aromatic mild savor with fine texture. The flesh is crunchy and juicy.

SENSITIVITIES & RESISTANCES

The rain increase the cracking sensitivity of the epidermis, especially on big calibers.

TECHNICAL ADVICE

Be careful not to overproduce the first year because it can be sensitive to alternating. Do not anticipate the harvest to not penalize juiciness and taste quality. Pruning on all types of wood.
